## **DETAILED ACTION**

### ***Specification***

The objection to the specification, outlined in the previous Office Action, has been overcome by applicant's amendment. The amendment corrects the diagrams of examples 48-58 as appropriate.

The objection to the specification because it did not include an abstract on a separate page has been overcome by applicant's amendment. The amendment includes an acceptable abstract.

### ***112 Rejections Maintained***

The rejection of claim 14 under 35 USC 112, first paragraph, outlined in the previous Office Action, is maintained for reasons of record. Applicant's amendment does not address the rejection other than to authorize an examiner's amendment if the prosecution has advanced to the point where the claims are otherwise allowable.

### ***Double Patenting rejections Withdrawn***

The double patenting rejection of claims 1-3, 6 and 10-16, outlined in the previous Office Action, is withdrawn. A new double patenting rejection follows.

### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or

Art Unit: 1621

discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-3, 6 and 10-16 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 2 and 9-14 of prior U.S. Patent No. 6,291,503. This is a double patenting rejection.

Claims 1-3, 6 and 10-16 are directed to the same invention as that of claims 1, 2 and 9-14 of commonly assigned US 6,291,503. The issue of priority under 35 U.S.C. 102(g) and possibly 35 U.S.C. 102(f) of this single invention must be resolved.

Since the U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302), the assignee is required to state which entity is the prior inventor of the conflicting subject matter. A terminal disclaimer has no effect in this situation since the basis for refusing more than one patent is priority of invention under 35 U.S.C. 102(f) or (g) and not an extension of monopoly.

Failure to comply with this requirement will result in a holding of abandonment of this application.
